Frédérik Dufour

Address:
Department of Economics
University of Toronto
150 St. George St.
Toronto, Ontario
M5S 3G7, Canada

Mobile: +1-514-917-5282
Email: frederik.dufour@mail.utoronto.ca
Languages: French (native), English (fluent)

Citizenship: Canadian

Research Interests: Energy, Empirical IO, Environmental Economics, Finance

Education

Ph.D. in Economics (5th year), University of Toronto — 2027 (Expected)
Committee: Adonis Yatchew (supervisor), Derek Olmstead

M.Sc. in Economics, Université de Montréal — 2021

B.Sc. in Economics (Honours), Université de Montréal — 2020

Research

Is the Trend of Negative Productivity Growth in Electricity Distribution Over? Empirical Evidence Using Ontario Data with Michael Scafe and Adonis Yatchew

Electricity Futures and Time-Varying Risk Premia: Evidence from Alberta with Derek Olmstead and Adonis Yatchew

Investment Timing Under Regulatory Cycles

Power Outages and Household Consumption - Evidence from California

Reports

Review of Total Cost Benchmarking Methodology for Electricity Distributors with Adonis Yatchew et al. (2024)
produced through a collaboration with the OEB and Climate Positive Energy
Published on the OEB website (link)

Awards and Grants

UofT/OEB-Sponsored Fellowship ($15,000)	2024 - 2025
UofT Doctoral Fellowship ($14,000 × 5)	2021 - 2026
Ph.D. Direct Access Scholarship ($10,000)	2020
Maurice Bouchard Foundation Award	2020
Lise Salvas Foundation Award	2020
Prix Jean-Marie-Dufour	2020
Prix Roger-Dehem	2020
Prix Robert-Lacroix	2020

Experience

Teaching Assistant

ECO1960: Energy and Regulation	2024 - 2026
ECO313: Environmental Economics and Policies	2026
ECO314: Energy and the Environment	2025
ECO475: Applied Econometrics II	2023
ECO333: Urban Economics	2023
ECO316: Applied Game Theory	2022
ECO502: Software TA (tutorials and general help for ECO courses)	2022 - 2026
Others: ECO101, ECO102, ECO220	2021 - 2026

Research Assistant

Adonis Yatchew: 2023 - 2025
- Data analysis of electricity distributors (Stochastic Frontier Analysis, Data Envelopment Analysis, Semi-parametric models, etc.)

Yao Luo: 2022 - 2023
- Replication of Kroft et al. (2022) and DellaVigna & Gentzkow (2020)

Marcel Boyer : 2020
- Data analysis of "Social Transfers in Kind" (STiK) to assess variations in consumption inequality more accurately. Other subjects: COVID-19 federal and provincial measures, water-related issues (pipe leakage).

Involvement

Student Energy (UofT Chapter), production of energy-related info capsules	2024 - 2025
Participant, The Governor's Challenge (Bank of Canada)	2020

Technical

Stata, R, Python, QGIS, MATLAB, LaTeX in research settings
